Hydroxyls Remove Multiple Odors

It was with great skepticism when I first inquired about your Hydroxyl Generators since I've heard of so many products claiming to eliminate odors. A friend with a DKI business in North Carolina originally sparked my interest in the product. I had knowledge of it but was always hesitant because of the "too good to be true" adage. His recommendation of the product prompted me to make the call.

We received the Boss and Boss XL3 in time to try it on its first job which happened to be sewer. A noticeable difference was evident by our staff and by the owners of the structure. After a thorough cleaning and sanitizing the Boss XL3 eliminated any residual odors.

Next the generators were put on a kitchen fire job with similar results. As we were working there with the machine running we noticed a drastic reduction in odor. After all was cleaned the generator ran for one more day and the odor was nonexistent.

A ***protein fire*** followed, then a ***suicide cleanup***, a ***skunk*** spray in a home and finally 2 more sewer jobs. I am thrilled to report excellent results in each and every one of those jobs. Our latest client described the **sewer odor in her home as "a million times better" after the introduction of the Hydroxyl generator**.

This is definitely going to eliminate the need for some of the other so called deodorizing machines. I am next looking forward to trying the MDU unit in the Health Care Industry. We are very excited about these products and their uses.

Sincerely,

Jeff Skrilow, CR, WLS
