Dear Odorox Air Technologies,

I would like to thank you for introducing our hotel to your green technology for odor elimination. Traditionally I am very skeptical and not impressed easily when it comes to new technologies that claim to do so many wonderful things. Well, I can tell you that the job your Odorox machines have done removing odor on our smoking floor/hallways, guest rooms, ballrooms, and common areas has made me one of your strongest supporters. We set your machines up in a desired area and go about the rest of our daily duties. When we return a short time later the space smells fresh and revitalized and your Odorox machine is ready for its next challenge.

As the Director of Housekeeping at a very busy Hilton in Parsippany New Jersey I am regularly confronted with various odor challenges. Just recently we started refinishing our bathtubs in all of our guest rooms. We know from past experience that this process can create a strong chemical smell that can make our guests and staff uncomfortable. Equipped with your machine I am happy to report these nuisance odors are things of the past.

Keeping our property smelling great is a key component to keeping our customers satisfied with the Hilton experience. I would like to thank Odorox for making my job just a little bit easier.

Thanks,

Lilly Sirkin
